Soft Skills

- Problem-solving
- teamwork,
- adaptability
- fast learning
- ownership of work.

Summary

Flutter developer with practical experience building mobile apps for grocery and E-commerce platforms. Also worked on backend development using ASP.NET Core Web API, including a full employee management system connected to a Flutter frontend. Built several ASP.NET Core MVC applications like a ticket booking system and an online mobile shop. Comfortable working across mobile, backend, and full- stack workflows, focusing on clean architecture and reliable delivery.

Education

Bachelor of Computer Science and Engineering   **May 2022 - May 2026**

International University of Business Agriculture and Technology, Dhaka
Currently I am in the 11th semester.
CGPA: **3.68**/4.00

Higher Secondary Certificate   **2018 - 2020**
Birshreshtha Noor Mohammad Public College
GPA: **5.00**/5.00

Secondary School Certificate   **2016 - 2018**
Birshreshtha Noor Mohammad Public College
GPA: **5.00**/5.00

Skills

Mobile Development
Flutter, Dart, REST APIs, state management (Provider), Firebase, SharedPreferences

Backend
ASP.NET Core Web API, EF Core, LINQ, JWT auth, SQL Server, MySQL

Web Development
ASP.NET Core MVC, Razor views, session handling, form/image upload

Tools
Git/GitHub, Postman, VS Code, Visual Studio, SSMS, Docker

Certificates

Master Git and Github - Beginner to Expert (Udemy)

ASP.NET Core Career Track (Ostad)

Foundational C# with Microsoft (freeCodeCamp)

DevOps Workshop for Absolute Beginner (Ostad)

Languages

- English

- Bengali

Hobby

- Travelling

- Playing

  Badminton

Projects

E-commerce App (Flutter): Built a multi-screen shopping application with product listing, search, wishlist, cart, and checkout. Implemented REST API integration, persistent user sessions, and responsive UI with smooth navigation.

Grocery App (Flutter): Developed a grocery shopping app with product filtering, cart management, user authentication, and fast API communication. Focused on performance optimization and clean state management.

Employee Management System (ASP.NET Core Web API + Flutter): Designed and developed a full backend system for employee records, attendance, departments, and authentication. Implemented JWT-secured APIs, EF Core data handling, and Flutter integration for real-time updates.

Ticket Booking System (ASP.NET Core MVC): Created a bus ticket management platform supporting schedule creation, seat selection, and booking workflows. Added admin features for managing buses, routes, and pricing, along with session-based user handling.

MobileShop (ASP.NET Core MVC): Developed a product management and shopping platform with image upload, product CRUD, cart handling, and order processing. Built user authentication, admin controls, and a structured MVC architecture.
